CYBERSECURITY AWARENESS PROGRAM

SMART. SAFE. SECURE.

As educators we are responsible for the safety of our students and their information. The first step in accomplishing this goal is knowing how to best protect ourselves.

PHISHING

Even if you know the source of an email or social media post, if it looks suspicious, delete it!

APPS AND WEBSITES

Be sure an app or website is safe to use before recommending it to your co-workers and students. Read the privacy policy!

PASSWORDS

Use strong passwords or passphrases and change them regularly. NEVER share your password with anyone.

BACK UP YOUR DATA

Protect the valuable information on your computers and mobile devices by making an electronic copy and storing it safely.

SOCIAL NETWORKING

Be careful about posting personal information about yourself or others. You never really know who might see it.
