Newport News Public Schools is preparing students to graduate college, career and citizen-ready.

**College-Ready**

- **Advanced Placement Courses.** The school division offers more Advanced Placement (AP) courses than any other school district or private school on the Peninsula. AP courses are open to all; students with qualifying grades may earn college credit.
- **Dual-Enrollment.** High school juniors and seniors have the option of earning college credit and high school credit concurrently through dual-enrollment courses at Thomas Nelson Community College (TNCC) and Norfolk State University.
- **Early College.** High school seniors may earn up to 19 semester hours of college credit prior to high school graduation in this unique partnership with Thomas Nelson Community College. During their senior year, students complete their high school course work during the first semester and attend TNCC during the second semester.

**Career-Ready**

- **Career Pathways.** Students are exposed to grade-appropriate career development experiences. Elementary and middle school students focus on career awareness and exploration, while high school students are exposed to career options through internships, job shadowing and hands-on training.
- **Science, Technology, Engineering and Math Education (STEM).** With innovative instruction, new technologies, renovated science labs, and resourceful business partners, students at all levels are engaged in hands-on activities that prepare them for further education and rewarding career possibilities in STEM.
- **Industry Certifications.** Career and Technical Education (CTE) courses are designed around industry standards to ensure high-quality instruction for high-wage, high-demand and high-skilled careers. CTE courses prepare students to earn more than a dozen industry certifications, accelerating student access to technical, high-skilled careers.

**Citizen-Ready**

- **Youth Development.** Through school leadership academies and participation in clubs and organizations, students have the opportunity to develop leadership skills, volunteerism and citizenship.
- **Service Learning.** Service to others is introduced, taught and practiced as part of the elementary curriculum. Middle and high school students provide a wealth of services to the community by contributing their time and talents to service projects and volunteer efforts.
