Clearing Your Browser's Cache.
Instructions for Netscape Users.

1. Click Edit, and select Preferences on the Netscape menu bar.
2. Click Advanced.

![Netscape Preferences window showing Advanced settings]

- Enable features that help interpret web pages:
  - Enable Java
  - Enable JavaScript for Navigator

Checked items are automatically enabled when you visit web pages that use them. If you uncheck an item, pages may load faster but some functionality will be limited.

- Send this email address as anonymous FTP password:

Enable features that affect performance:
- Enable Quick Launch (Designed for single-profile users)
3. Click Cache.

4. Click the Clear Memory Cache button.
5. Click the Clear Disk Cache button.
6. Click OK.
